## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a). A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 19-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeo et al (2005/0040493) in view of Sanada et al (2003/0195275), the IBM Tech Bulletin to Wolf and Kwon. The Yeo reference teaches that under some circumstances a vertical resistance structure that uses an aluminum oxide film (116) may be formed. See, for example, Fig. 1 of Yeo where resistive path (124) may include aluminum oxide layer (116).

The Sanada reference teaches that it is known to use aluminum electrodes (17-1) in a vertical resistor structure [0138], which also incorporates an aluminum oxide layer (19) therein.

As stated in the previous action, the references to Wolf and Kwon teach that it is also known to use doped aluminum electrodes and other sandwich structures using aluminum and Ti, Mo or niobium nitride in devices such as claimed.

Taken together, these references teach all of the claimed features of the invention. One skilled in the art would be motivated to combine these references in order to achieve superior resistor structures using aluminum oxide.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action

Art Unit: 2815

is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX

MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should

be directed to Edward Wojciechowicz whose telephone number is 571-272-1739. The examiner can

normally be reached on Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Tom

Thomas can be reached on (571) 272-1664. The fax phone number for the organization where this

application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application

Information Retrieval (PAIR) system. Status information for published applications may be obtained from

either Private PAIR or Public PAIR. Status information for unpublished applications is available through

Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC)

at 866-217-9197 (toll-free).
